TRANSPORT LOGISTIC - MONACO
Hall B2 Stand N. 329/340

PUGLIA: THE REGION FOR SMART BUSINESSES

Puglia is an emerging region in the southeast of Italy, steeped in history but as innovative as the Silicon Valley, where the endless beauty of the sea and rural landscapes have turned it into a top tourist destination and where the high quality of life represents an asset for local businesses. It is an authentic and modern, forward-looking region, which offers many advantages to potential investors and represents the ideal location for smart companies looking to strengthen their presence in Europe, at the heart of the Mediterranean.

The region has been able to build a strong reputation in the international panorama as a hub for innovation thanks to the ongoing activities of the far-reaching R&I ecosystem which brings together more than 415 private and public entities, including local universities, business and technology clusters, laboratory networks and start-ups. Recognised as one of the most dynamic regions in the south of Italy, with over 380,488 active businesses registered in 2024 (Source: InfoCamere) and an ever-increasing international standing, the region's attractiveness as a business location has become more and more tangible over recent years, boosted by regional incentives for business investment projects, aimed at supporting innovative start-ups and SMEs, as well as MNEs, looking to expand operations in Europe. Regione Puglia stands out for its commitment to investment in research and innovation, focusing mainly on smart technologies and providing a significant boost both to hi-tech and traditional sectors, encouraging investments in smart transportation, sustainable manufacturing, digitalization, intelligent energy systems, modern logistics and transportation infrastructures.

PUGLIA: A REGION ON THE MOVE

Puglia commands a strategic geographical position, in the south-east of Italy, at the heart of the Mediterranean Basin, and boasts a modern and efficient infrastructure network, where the logistics sector has become a driving force for economic growth and development across the region's many industries. The regional logistics system comprises a strategic network of connections characterized by an ever more efficient inter-modal transport plan of connecting roads, railway lines, seaports and airports, comprising: - 12,000 km of road network that includes 2 major motorway arteries - 1,528 km of railway lines - 3 major seaports: Bari (passenger and freight traffic); Brindisi (passenger and freight traffic), and Taranto (freight traffic; 3rd largest container shipping port in Italy for cargo handling); - 6 secondary ports: Manfredonia (FG), Barletta (BAT), Molfetta (BA), Monopoli (BA), Otranto (LE), Gallipoli (LE), active in trade, fishing industry and/or pleasure boats; - Intermodal traffic hub in Bari (Interporto Regionale della

Puglia); - Regional airport network: - 2 international airports (Bari and Brindisi), with over 100 connections to national and international destinations; - 1 domestic airport (Foggia); - 2 cargo traffic (Bari e Brindisi) and an industrial cargo airport (Taranto - Grottaglie) which has been qualified as an airport testbed for remotely piloted aircraft systems (RPAS) and recently designated by the Italian Ministry of Transport as the first Spaceport in Italy, in preparation for suborbital flights and other space travel operations. The region's transport system will further benefit from the Regional Government's Transportation Plan 2021-2030, a long-term blueprint for investments in infrastructure with a strong emphasis on Intelligent Transport Systems (ITS), sustainability and access, which aims to enhance the region's standing as international hub for passenger and freight traffic within the Euro-Mediterranean area.

SPECIAL ECONOMIC ZONES

A Special Economic Zone (SEZ) is a geographically limited area in which businesses can benefit from special investment and development conditions.

The SEZ of Southern Italy is the largest in Europe in terms of population. It replaced the previous eight SEZs, which were limited to back-port areas. Now, all municipalities in the Puglia region are part of the newly established SEZ of Southern Italy. The Strategic Plan identifies nine strategic supply chains to strengthen: agribusiness and agroindustry, tourism, electronics and ICT, automotive, Made in Italy products, chemistry and pharmaceuticals, naval and core research, aerospace and railways. The plan also identifies three technologies to promote: digital technologies, cleantech and biotech. Some advantages of the single SEZ of Southern Italy are a "fast track" administrative process (i.e., the Autorizzazione Unica), with certain and reduced timeframes, and a single portal for submitting application forms (S.U.D. ZES). Other advantages include incentive measures, such as tax credits for investments in the SEZ, contributions for employment relief, grants, and concessional financing. Projects are declared public utilities, and the "Autorizzazione Unica" can include urban planning variations, where necessary.

MAIN INDUSTRY SPECIALISATIONS

- Air and sea freight transport
- Road and railway transport
- Freight forwarding
- Ro-ro and ro-pax ferry connections
- Storehouse services
- Cargo handling
- Info-mobility, software systems for container tracking
- IoT systems for supply chain management
- Integrated logistics
- Intermodal logistics
- Telecommunication systems

COMPANY PROFILE

With its warehouses in Bari (Modugno industrial area and "Ferruccio" public railway station), the A.T.L. S.R.L. has been guaranteeing since 1998 multiservice logistics services for food and non-food goods, at room temperature and controlled temperature, including storage and secondary transport. The distribution platform service for GD, GDO and HoReCa companies allows widespread deliveries, transit points, fractional distribution with deliveries to points of sale, as well as city distribution.

We guarantee the constant maintenance of the temperature inside the cold rooms, unloading and loading the goods through the dock shelters connected to the warehouse anteroom, also guaranteeing the hygiene of the load. The goods are placed in the refrigerated ante room for the time necessary for their identification and IT cataloging to then be immediately stored inside the cold rooms equipped with shelving.

With a total of 80,000 square meters we are

able to take care of any type of product.

- Refrigerated warehouses at controlled temperature from +8° to -25° with 1200 pallet places.
- Refrigerated warehouses at -30° controlled temperature with 2,200 pallet places.
- 16,000 m2 of warehouses with and without shelving.
- 3,000 m2 of warehouses connected within the "Ferruccio" railway station of Bari.

+39 336 608961
info@hyperionsoftware.eu

www.hyperionsoftware.eu

COMPANY PROFILE

Innovative Italian SME focused on the logistics sector with a digital twin representation approach.

MAIN PRODUCTS AND SERVICES OFFERED

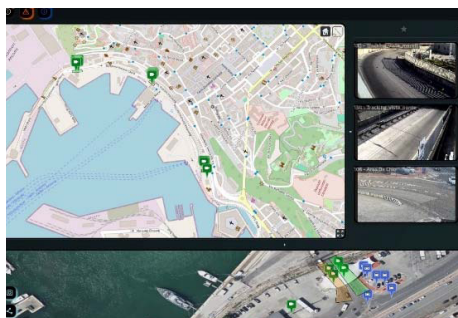

We propose an innovative IT platform based on video analysis and patented representation of events in an interactive 3D digital twin. A single easy-to-use, reliable, real-time user interface of information from multiple perceptual visual sensors enables the application of analysis to provide the necessary responses and react autonomously according to predefined policy rules.

COMPETITIVE ADVANTAGES:

- Easy creation of multiple rules for the same sensor and area. Multiple rules can be created geographically within the digital twin: data fusion enables the implementation of cross-analysis and

cross-validation that provide far superior results than any other technique to minimise false alarms.

- Time-scale and long-distance event tracking. Video analysis is extended to multiple streaming sources and signal detection. It is not limited to input analysis of a single intelligent camera.
- Comprehensive visualization of geospatial information. Data acquired from multiple sources are merged and rendered into a georeferenced virtual reality.

CONTACT PERSON

Nicola Pacucci
GENERAL MANAGER

- Privacy protection. Safety and Security operations are performed privacy compliant: avatars protect identities in the virtual twin of the user interface.

ADVANTAGES:

- INCREASED ACCURACY with reduced overall costs. Reduced response costs.
- INCREASED EFFECTIVENESS. Sophisticated monitoring of dynamics for hazard prevention in complex environments such as logistic areas.

- INCREASED RISK AWARENESS. A more informative and explanatory visual interface for operators is provided.

APPLICATIONS:

HARBOURS – AIRPORTS – LOGISTIC AREAS - INDUSTRIAL PLANTS - SMART CITIES

NET OF TRUCKS S.R.L.

Via Pansini Legnami,8
70056 Molfetta (BA), Italy

+39 080 2228289
netoftrucks@gmail.com

www.net-of-trucks.com

COMPANY PROFILE

Net of Trucks s.r.l. is a company specialized in freight transport on behalf of third parties, registered in the National Register of Road Haulers, with operational branches in Molfetta and Bari. Operating across the entire Italian territory, including the islands, as well as internationally throughout Europe, the company provides efficient and tailored logistics solutions.

Thanks to the EX ART. 68 authorization, our company has direct access to the Port of Bari, streamlining transport and logistics operations. The company handles over 2,500 containers annually, working in partnership with leading agencies in the sector.

The company fleet consists of highly specialized vehicles, including refrigerated trucks for temperature-sensitive cargo, crane trucks for lifting and specific loading operations, as well as a wide range of vans, tractor units, and semi-trailers. The company also operates curved chassis vehicles for

local container handling, supported by a warehouse located at the Bari interport and a new logistics hub in the Molfetta industrial area, dedicated to warehousing and storage. By continuously investing in technology and innovation, our company employs next-generation Euro 5 and Euro 6 tractor units, equipped with adjustable side curtains and roof and side openings to facilitate loading operations. The company offers full truckload (FTL) transport, groupage shipments, and ADR deliveries with hydraulic tail lift, ensuring reliability, safety, and operational efficiency.

Grottaglie Airport (LIBG; TAR): your air gateway for all types of cargo

Grottaglie Airport hosts a modern air-side logistics platform, equipped to efficiently handle all categories of freight, including oversized and special project cargo. The terminal offers:

- Screening system for large and irregular cargo
- Certified scale up to 30 tons Refrigerated warehouse for perishable goods
- Comprehensive GSE (Ground Support Equipment)
- Fast and efficient cargo acceptance service
- Dedicated expertise in project cargo handling
- Border Control Post (BCP) under completion, enabling the import of food products of both animal and non-animal origin.

The cargo terminal is operated by Gesfa, a specialized handling agent with extensive experience in airport logistics. The airport is directly connected to Italy's main road

network via the A14, A3, and Sinnica routes, ensuring smooth access to key markets across Southern Italy.

Thanks to its strategic location, Grottaglie serves a wide and dynamic catchment area, making it the ideal hub for international shipping and regional distribution.

COMPANY PROFILE

Our company is a dynamic and reliable transport company based in Italy, specializing in national and international freight services with a strong focus on intermodal logistics. We believe logistics should not only be fast and efficient, but also smart and sustainable. That's why we develop customized transport solutions that integrate road, rail, and sea, ensuring flexibility, cost-effectiveness, and a lower environmental impact.

By combining different modes of transport, we help streamline supply chains, avoid road congestion, and improve delivery reliability while also supporting greener practices. Our intermodal services are ideal for businesses that need to move goods efficiently across Italy and throughout Europe.

With years of experience and a dedicated team, we are committed to delivering high-quality service and continuous innovation. With an eye on innovation and sustainability, we move your business forward across Italy and beyond.

MAIN PRODUCTS AND SERVICES OFFERED

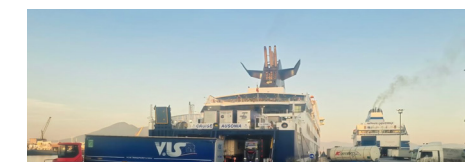

- National and international freight transport
- Intermodal logistics solutions
- Sustainable logistics strategies
- Supply chain optimization
- Real-time tracking and monitoring
- Exceptional transport

OPPORTUNITIES FOR COLLABORATION

We are seeking to increase our network through forming partnerships with firms, brokers, suppliers, and hauliers that embrace our commitment to reliable and sustainable logistics. Teaming up with us implies becoming part of a lively and expanding

team, with the possibility to create long-term collaborations in both local and foreign cargo transport. Together, we can design more intelligent, more effective, and eco-friendly supply chain strategies.
